

TOGGING TIPS: Togs-on-Wheels for the Busy Clinician

Full Body Clinical Sizing Kits now come with a Strap & Tab Parts Organizer panel (modeled after an over-the-door shoe organizer) that allows the clinician to keep her straps, tabs, and tools all in one handy location.

Clinical Resource Idea

Lisa Mackell, PT and President of Theraplay, Inc. of West Chester, PA, shared this idea with us recently:

- § She bought a rolling garment rack from a nearby retailer to serve as the base of her TheraTogs-on-Wheels setup.
- § She hung the Parts Organizer at one end to hold her straps, tabs, scissors, and other tools.
- § She hung her Sizing Kit garments on the other end on clothes hangers.

Lisa shows off her Togs-On-Wheels portable Sizing Kit. Fully loaded, the setup typically weighs less than 20 lbs.

Lisa with a side view of the rolling Sizing Kit. The setup easily rolls through doors, between clinic rooms, and even between beds out on the wards.

All garments should be stored on hangers.
