

Autism / Sensory Integration System

Our TheraTogs Autism/Sensory Integration System is designed specially for children with issues related to:

- ❑ Autism Spectrum Disorder (ASD)
- ❑ Sensory Integration/Processing Disorder (SI/SPD)
- ❑ ADD/ADHD

The TheraTogs system can be used to address such as issues as hypersensitivity, difficulty in focusing attention, ‘stimming’, holding still, and coordinating movement. TheraTogs are especially effective at calming patient behaviors and increasing patient attention - which can help improve the practice and efficacy of other management modalities.

The Autism / Sensory Integration System provides the tactile and proprioceptive input that has been shown to help children with ASD, SPD and ADHD.

The Autism/SI system provides the following:

- ✓ The cozy, foam-lined, breathable TankTop applies gentle compression to the torso to enhance tactile and proprioceptive body awareness.
- ✓ The similarly cozy Hipster provides more body awareness of the hips and thighs, and serves as an anchor for securing the TankTop and for attaching compression straps if further “grounding” is needed.
- ✓ Abdominal support strap that also holds the compression straps against the body.

It’s a wearable hug - discreetly hidden under your client’s clothes!

Although the Autism/SI System includes basic strapping for sensory input applications, additional strapping may be purchased separately to address biomechanical or postural issues.

NO WEIGHTS, NO CUMBERSOME ATTACHMENTS — JUST GENTLE, CALMING, GROUNDING INPUT.

If your client has these indications...	A TheraTogs Autism/SI System can provide...
Sensory Proprioception Deficit and/or Attention Deficit	Compression to the torso and hips to enhance body awareness and promote a calming or grounding experience
Mild hypotonia resulting in difficulty in coordinating motion	Dynamic and adjustable postural support and compression through the spine and hip joints
Motor Skills Deficit (sitting or standing)	Compression and postural support through the spine and hip joints that is adjustable for sitting and standing therapy modalities

Model Sizes

Model No.	Description	Model No.	Description
#SI109	Infant Autism/SI System 15-25 lbs	#SI309	Pediatric Autism/SI System: 45-65 lbs
#SI209	Pre-School Autism/SI System: 25-45 lbs	#SI409	Petite Adult Autism/SI System: 65-110 lbs

How to Order

- ❑ In the USA, TheraTogs may be ordered through your local or regional orthotist or DME network, particularly if reimbursement is a requirement. See the TheraTogs website (www.theratogs.com) for a list of Providers in your area.
- ❑ TheraTogs are also carried by leading distributors in the physical rehabilitation field all over the globe.

About TheraTogs

TheraTogs provide a foam-lined, Latex[®]-free, breathable, comfortable, Velcro[®]-sensitive “external skin” for clinicians engaged in sensorimotor training of clients with developmental disabilities and selected orthopedic malalignments, and for clients in rehabilitation following brain injury, stroke, orthopedic surgery, or neurosurgery.

TheraTogs are made of a patented, washable composite fabric with a foam backing made of an aqueous-based elastomeric urethane. TogRite™ is Latex-free elastomeric strapping with an inert, silicone-based grip surface.

TheraTogs™ are Class I medical devices intended to be issued by, and applied under the supervision of, a licensed healthcare practitioner.

TheraTogs are U.S. and foreign patent pending.
