

Adult Shoulder Positioning System

The **Adult Shoulder Positioning System** is designed for application to a single shoulder, and is designed to support the clinical objectives of managing or correcting various postural, scapular, and shoulder mal-alignments while leaving the elbow and forearm unconfined.

The TankTop provides a stable, Velcro®-sensitive surface area to attach strapping selected by the clinician to address scapular hypermobility, shoulder protraction, and moderate shoulder subluxation.

The long Torso Strap provides an alternative anchor for strapping applications when the TankTop is not needed.

AT LEFT: SHOULDER SYSTEM (SHOWN WITH SHOULDER STRAP “FEATHERED” TO GRIP HUMERAL HEAD) PROVIDES PROLONGED LOW-LOAD POSITIONING SUPPORT TO RETRAIN SHOULDER MUSCULATURE

AT RIGHT: SHOULDER SYSTEM WITH TORSO STRAP

Optional Pelvic Anchor

If the TankTop requires stable anchor points at the waist for maximum effectiveness as a base for attaching strapping, you may purchase a Pelvic Anchor - a “lite” version of the TheraTogs Hipster.

For the torso with a larger waist than rib cage circumference, the Pelvic Anchor provides just enough stable Velcro®-sensitive “real estate” to secure the TankTop against riding up, with easy self-donning for those who are able.

If your client has these indications...	A Shoulder Positioning System can ...
Shoulder pain due to chronic mal-alignments, impingement, rotator cuff injury, or fracture	Elevate the humerus while allowing elbow movement
Shoulder subluxation - mild to moderate	Improve shoulder joint stability and comfort
Brachial Plexus injury (BPI)	Improve functional joint alignment Assist injured musculature Reduce associated flexible thoracic kyphosis
Shoulder dislocation, pre-operative or post-operative	Improve scapular stability and shoulder alignment, and reduce excessive compensatory trunk deviations

Model Sizes

Model No.	Description	Model No.	Description
#403	Petite Adult: 65-110 lbs	#703	Small Adult Male: 110-145 lbs
#603	Small Adult: 110-140 lbs	#713	Medium Adult Male: 145-170 lbs
#613	Med Adult Female: 140-170 lbs	#723	Large Adult Male: 170-190 lbs
#623	Large Adult Female: 170-200 lbs	#733	X-Large Adult: 190-240 lbs

How to Order

- ❑ In the USA, TheraTogs may be ordered through your local or regional orthotist or DME network, particularly if reimbursement is a requirement. See the TheraTogs website (www.theratogs.com) for a list of Providers in your area.
- ❑ TheraTogs are also carried by leading distributors in the physical rehabilitation field all over the globe.

About TheraTogs

TheraTogs provide a foam-lined, Latex[®]-free, breathable, comfortable, Velcro[®]-sensitive “external skin” for clinicians engaged in sensorimotor training of clients with developmental disabilities and selected orthopedic malalignments, and for clients in rehabilitation following brain injury, stroke, orthopedic surgery, or neurosurgery.

TheraTogs are made of a patented, washable composite fabric with a foam backing made of an aqueous-based elastomeric urethane. TogRite™ is Latex-free elastomeric strapping with an inert, silicone-based grip surface.

TheraTogs™ are Class I medical devices intended to be issued by, and applied under the supervision of, a licensed healthcare practitioner.

TheraTogs are U.S. and foreign patent pending.
